GROUP	21	FUNGICIDE
--------------	-----------	------------------

24(c) SPECIAL LOCAL NEEDS LABEL FOR CONTROL OF PINK ROT ON POTATOES
IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH IT LABELING
FOR DISTRIBUTION AND USE ONLY IN THE STATE OF IDAHO

EMERGENCY CALLS: 800-331-3148

This label for Ranman Fungicide is valid until December 31, 2010 or until otherwise amended, withdrawn, canceled or suspended.		
CROP	RATE OF APPLICATION	PEST
Potatoes	At-Plant - 0.42 fl oz per 1000 linear feet of row (6.1 fl oz/A on 36" row spacing)	Pink Rot (<i>Phytophthora erythroseptica</i>)
	Lay-by/Hilling- 2.75 fl oz per Acre as a broadcast spray.	
DIRECTIONS FOR USE Application Instructions (Planting time treatment): For Pink Rot control, apply 0.42 fluid ounces product per 1000 linear foot of row in-furrow at planting using a minimum of 5 gallons of water per acre. Apply RANMAN FUNGICIDE using a 6 to 8 inch band directly over the seed pieces prior to furrow closure. A side dressing of RANMAN FUNGICIDE applied at hilling may be necessary for additional control. Where mefenoxam-resistant strains of <i>Phytophthora erythroseptica</i> are not present, a full rate of RANMAN FUNGICIDE can be tank-mixed with mefenoxam containing fungicides for additional control. Application Instructions (Lay-by/Hilling time treatment) For additional control of Pink Rot in combination with an at-planting, in-furrow, RANMAN FUNGICIDE application, apply RANMAN FUNGICIDE as a broadcast spray at 2.75 fluid ounces plus 2.0 fl oz/A organosilicone adjuvant in a minimum of 20 gallons of finished spray solution per acre at hilling. Additional applications may be needed depending on susceptibility of potato varieties to pink rot disease, environmental conditions conducive to favor severe disease development, or fields located in long growing season areas, etc.		
Resistance Management: Do not use RANMAN FUNGICIDE at reduced rates as incomplete control may occur promoting potential for development of resistant strains. Rotate other fungicides with a different mode of action or tank-mix these fungicides with RANMAN FUNGICIDE to reduce the chance of resistance occurring. Development of resistance cannot be predicted. If a treatment of RANMAN FUNGICIDE is not effective, a resistant strain of fungi may be present. Accordingly, neither RANMAN FUNGICIDE nor other fungicides with a similar mode of action, will effectively control the disease. Consult your local State University for alternative recommendations.		
RESTRICTIONS: <ul style="list-style-type: none">• DO NOT apply more than 27.5 fluid ounces per acre per year.• DO NOT apply within 7 days of harvest.• Crops on the federal label may be planted immediately after the last treatment. Do not plant other crops not registered on the federal label for this product within 30 days after the last application.		
ALL APPLICABLE DIRECTIONS, RESTRICTIONS, AND PRECAUTIONS ON THE EPA REGISTERED RANMAN FUNGICIDE LABEL (EPA Reg. No. 71512-3-279) MUST BE FOLLOWED.		
THIS LABEL MUST BE IN THE POSSESSION OF THE USER AT THE TIME OF PESTICIDE APPLICATION.
